Broadband Internet Access in Nebraska Population Centers

For all population centers listed by the Census Bureau

Statewide Satellite Access Providers are not listed - See notes at end of report

Bounty	Population Center	Serving Telephone Company	BROADBAND INTERNET			
			DSL	ISDN	WIRELESS	CABLE MODEM

Note - There are two or three satellite providers of broadband access. The newest with the latest technology is WildBlue which is owned by the "National Rural Telephone Cooperative" and several major investors. WildBlue is a two way satellite broadband service whereas earlier satellite service used a one way down link from the satellite with the uplink by traditional telephone lines. Many of Nebraska's Telephone Industry Companies are providing sales, installation and ongoing service for WildBlue. These telephone companies cover the entire state with installation and support of WildBlue Services. This product has been so well received that additional satellites are being placed in orbit to keep up with demand.
